CREA COMMUNITY OF RESEARCH ON EXCELLENCE FOR ALL

Scientific citizens movement

The scientific citizens movement is the dialogic continuous diverse interactions (face-to-face and online) between scientific evidence and active citizenship. It is currently transforming science, society and social movements. It was founded in 1991 by the communicative methodology research that co-created the concepts of social impact and co-creation. It was incorporated as a requirement of science at the beginning of the 21st century and later a requirement of institutions, companies, organizations and social movements.
